Mounting Instructions

In the application all ratings according to the datasheet have to be respected. After mounting, the wiring must be checked and the switch must operate smoothly. When building the switch in an enclosure, the space envelope must be respected according to the applicable standards.

Maintenance

The X type switches are designed for a very long life but it is advised to do some simple yearly maintenance.  
 - Check the installation for signs of overload or overheating. The terminals may not exceed the limit of 85°C under full load.  
 - By operating the switch a few times (5x) the contacts will clean themselves and the switch will have a longer life.

Connection details	Description	Symbol	Values	Unit
Rated operational current (DC poles)	le	25	A dc	
Required fine wire cross-section (minimal): AWG	AWG	4	AWG	
max power dissipation	P	7.1	W	

The terminals, without interconnection can take copper wires up to 6 mm2.  
 The recommended Spade Terminals may have a maximum width of 9 mm.  
 For CSA and UL applications, registered Spade Terminals must be used.  
 The registration numbers are UL-E13288 and CSA-LR7189 (for instance type 165015 from Tyco).
