**Mounting instructions**

In the application all ratings have to be respected. The switch is designed for use on a flat surface of at least a Type 1 Enclosure or equivalent. The minimum dimensions of the enclosure must be respected according to the applicable standards. The position of the handle of the switch shall be marked with a Position Indication plate or direct on the surface of the enclosure to guide proper indication. The "On" and "Off" position may be marked using the symbols "I" and "O" according IEC 417 Symbols 5007 and 5008. The terminals, without interconnection can take copper wires up to 6 mm<sup>2</sup>. The recommended Spade Tongue Terminals may have a maximum width of 9 mm. For CSA and UL applications, registered Spade Tongue Terminals must be used. The registration numbers are UL: E13288 and CSA: LR7 189 (for instance type 165015 from Tyco). After mounting, the wiring must be checked and the switch must operate smoothly.

**Maintenance**

The X type switches are designed for a very long life but it is advised to do some simple yearly maintenance. Check the installation for signs of overload or overheating. The terminals may not exceed the limit of 85°C under full load. By operating the switch a few times (5x) the contacts will clean themselves and the switch will have a longer life.
