## Data Sheet Santon X－Type switch X100．32RL2E－（A）－E

Switch disconnector for solar application according to
IEC 60947－3 by KEMA

Contacts are made in＂X＂marked position． Symbols for interconnection：［］

$H$ is the number of layers in the switch

## Mounting instructions

In the application all ratings have to be respected．When building the switch in an enclosure，the space envelope must be respected． The terminals can take flexible wires up to $6 \mathrm{~mm}^{2}$ and fork shoes for wires up to $10 \mathrm{~mm}^{2}$（type 3547C from Vogt）．After mounting，the wiring must be checked and the switch must operate smoothly．

## Maintenance

The $X$ type switches are designed for a very long life but it is advised to do some simple yearly maintenance．
Check the installation for signs of overload or overheating．The terminals may not exceed the limit of $85^{\circ} \mathrm{C}$ under full load．
By operating the switch a few times（ 5 x ）the contacts will clean themselves and the switch will have a longer life．

Dimensions，specifications and data shown are be subject to change without notice．
